

life cycle analysis of a wallet

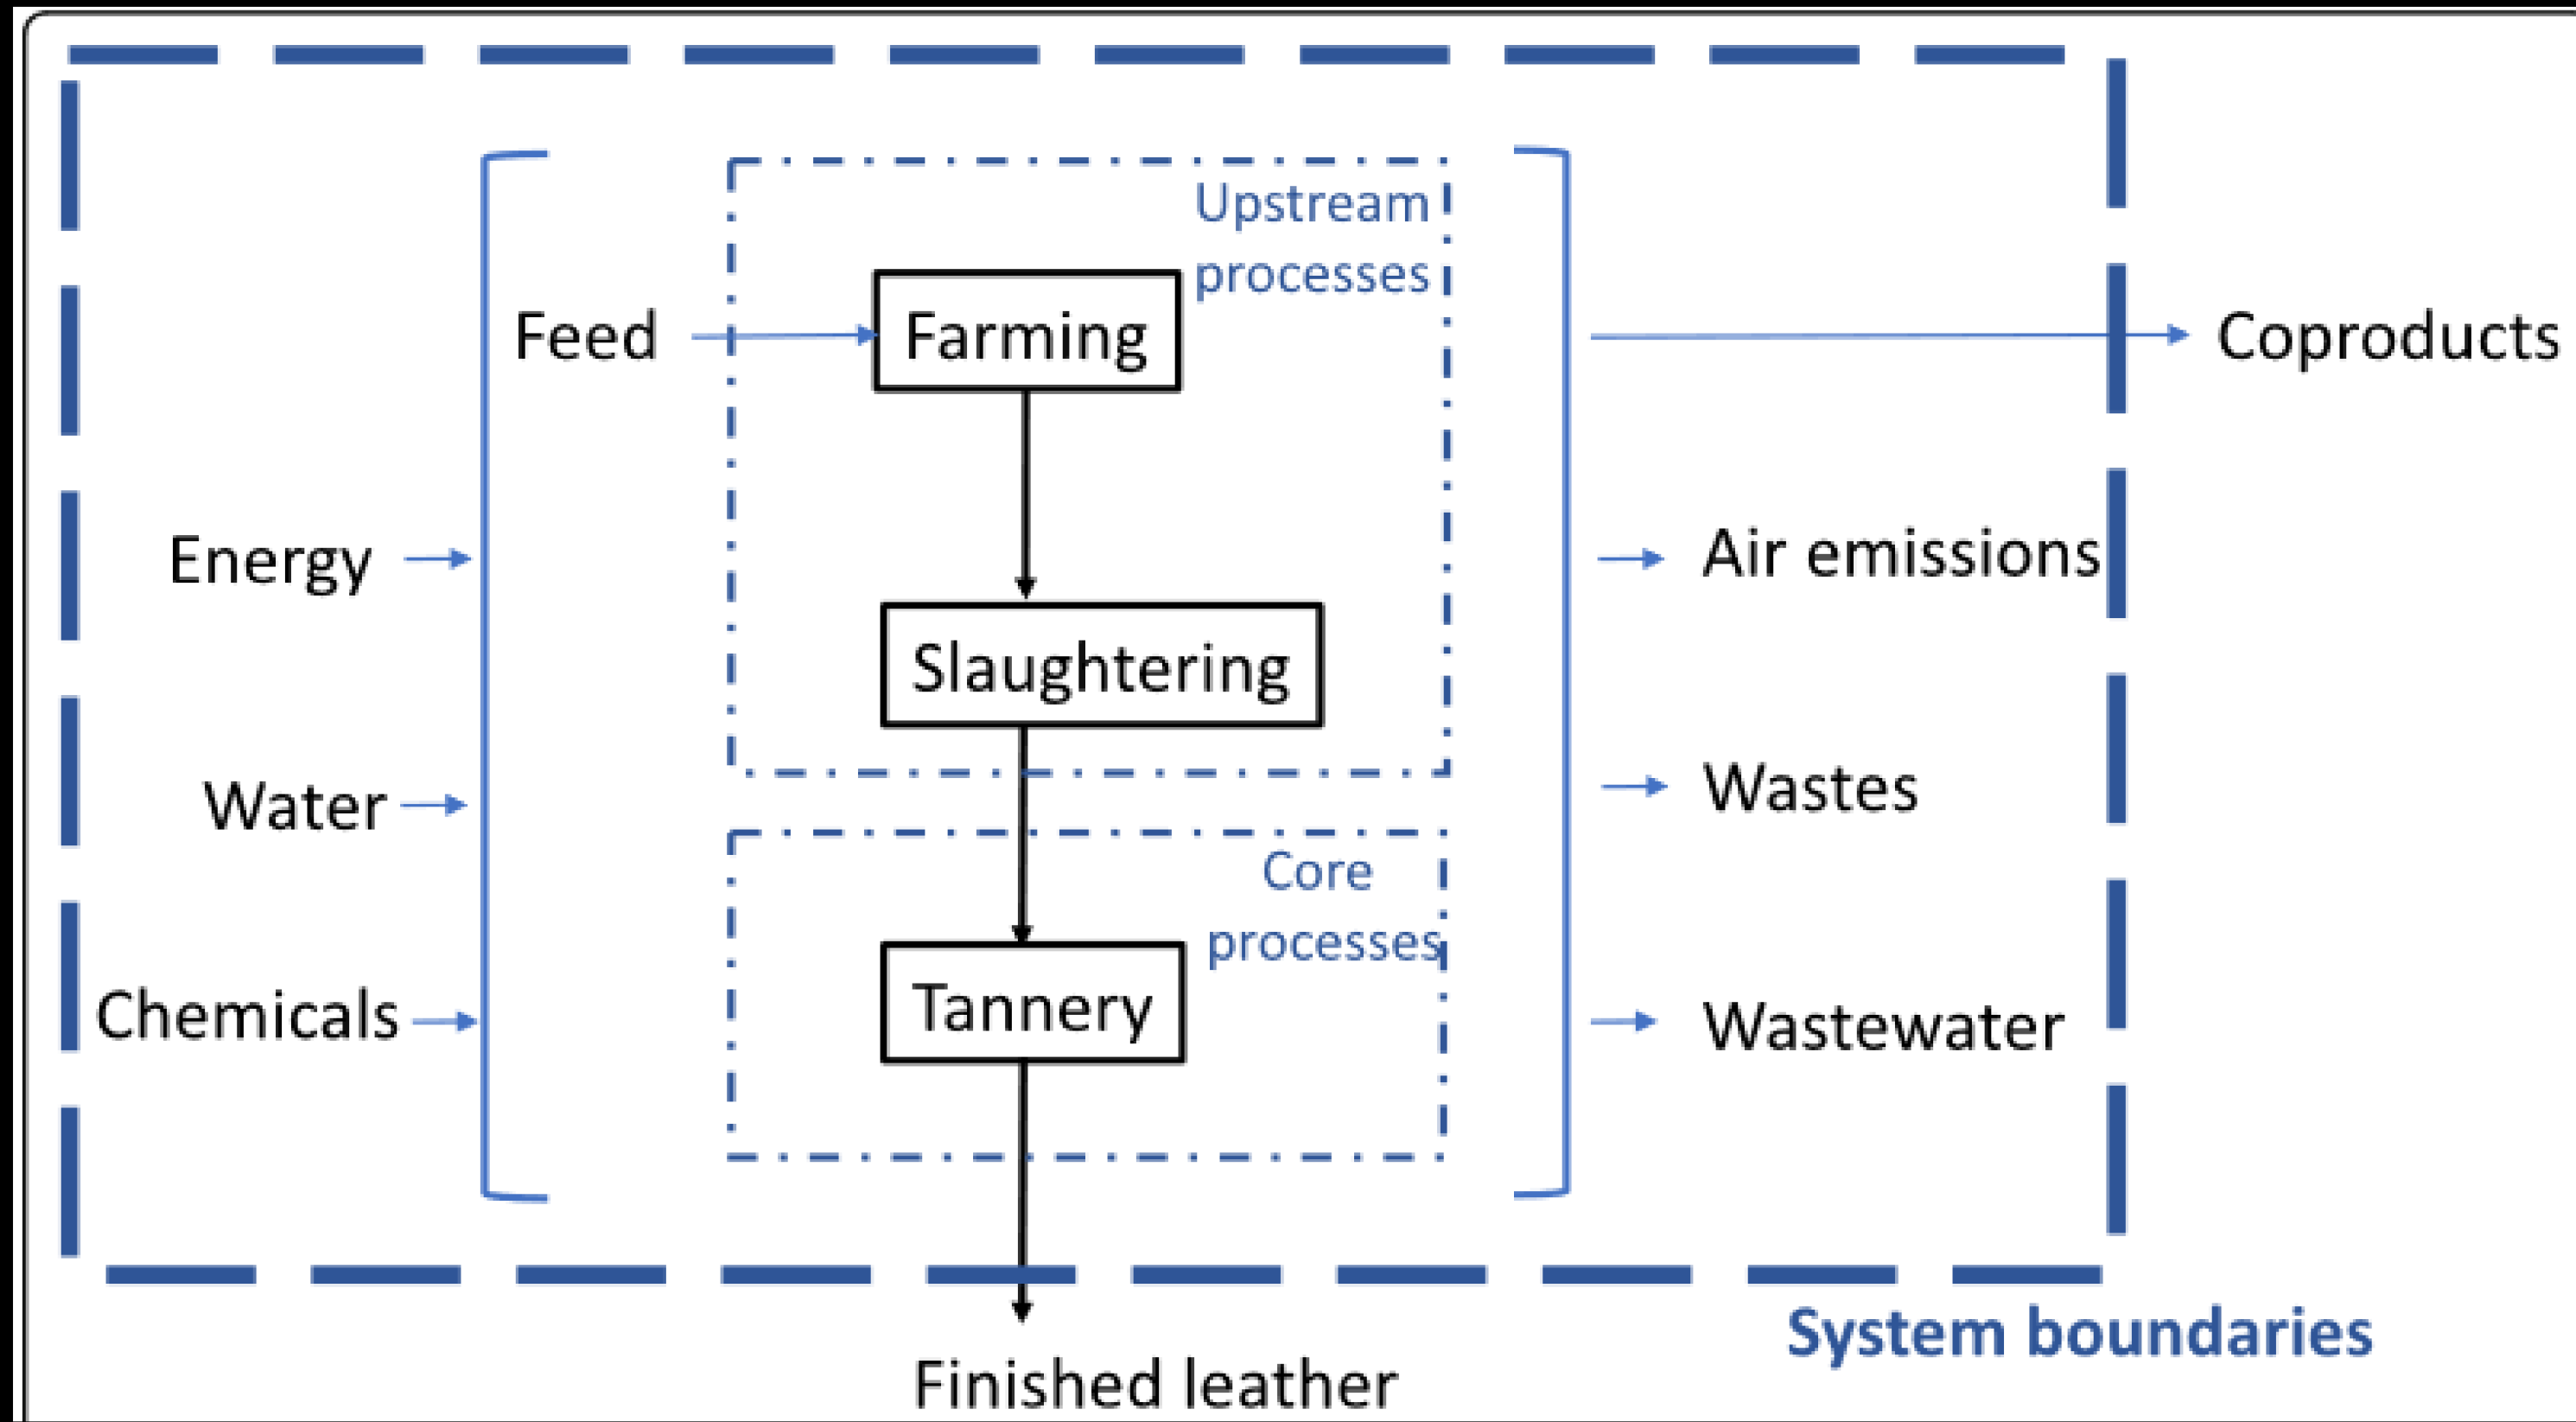

Killian CROOSON--SAVARY

overview of the presentation

production of raw resources

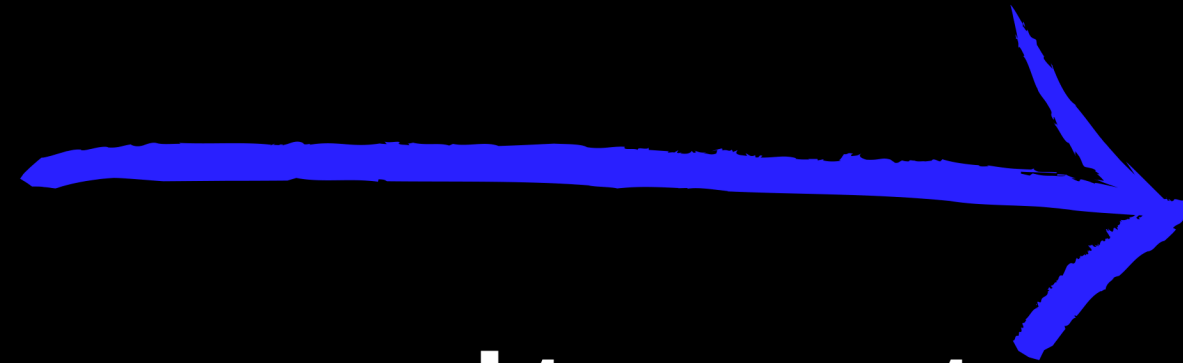

transportation

producer

maker

leather

leather

- . road transport**
- . train transport**
- . plane transport**

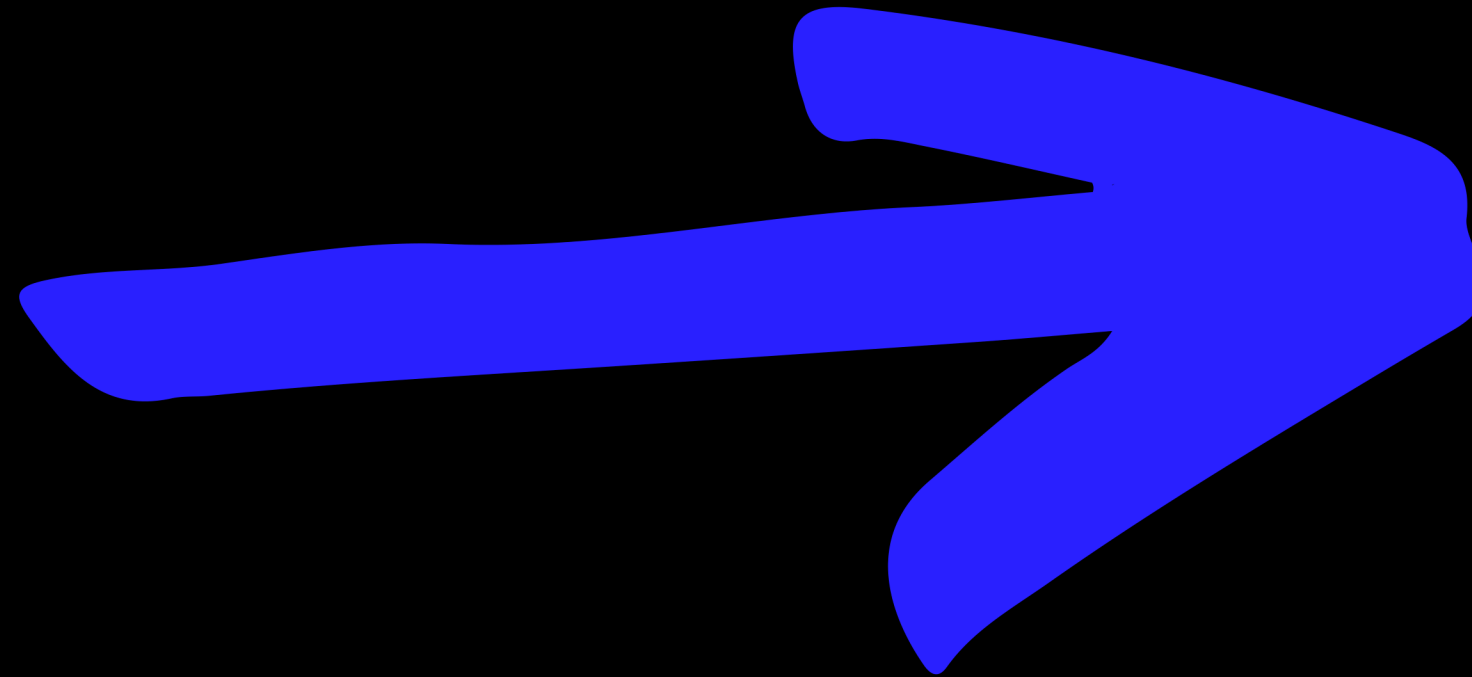

making the wallet

materials

products

**leather
threads
these weird looking buttons**

**wallet
loss products**

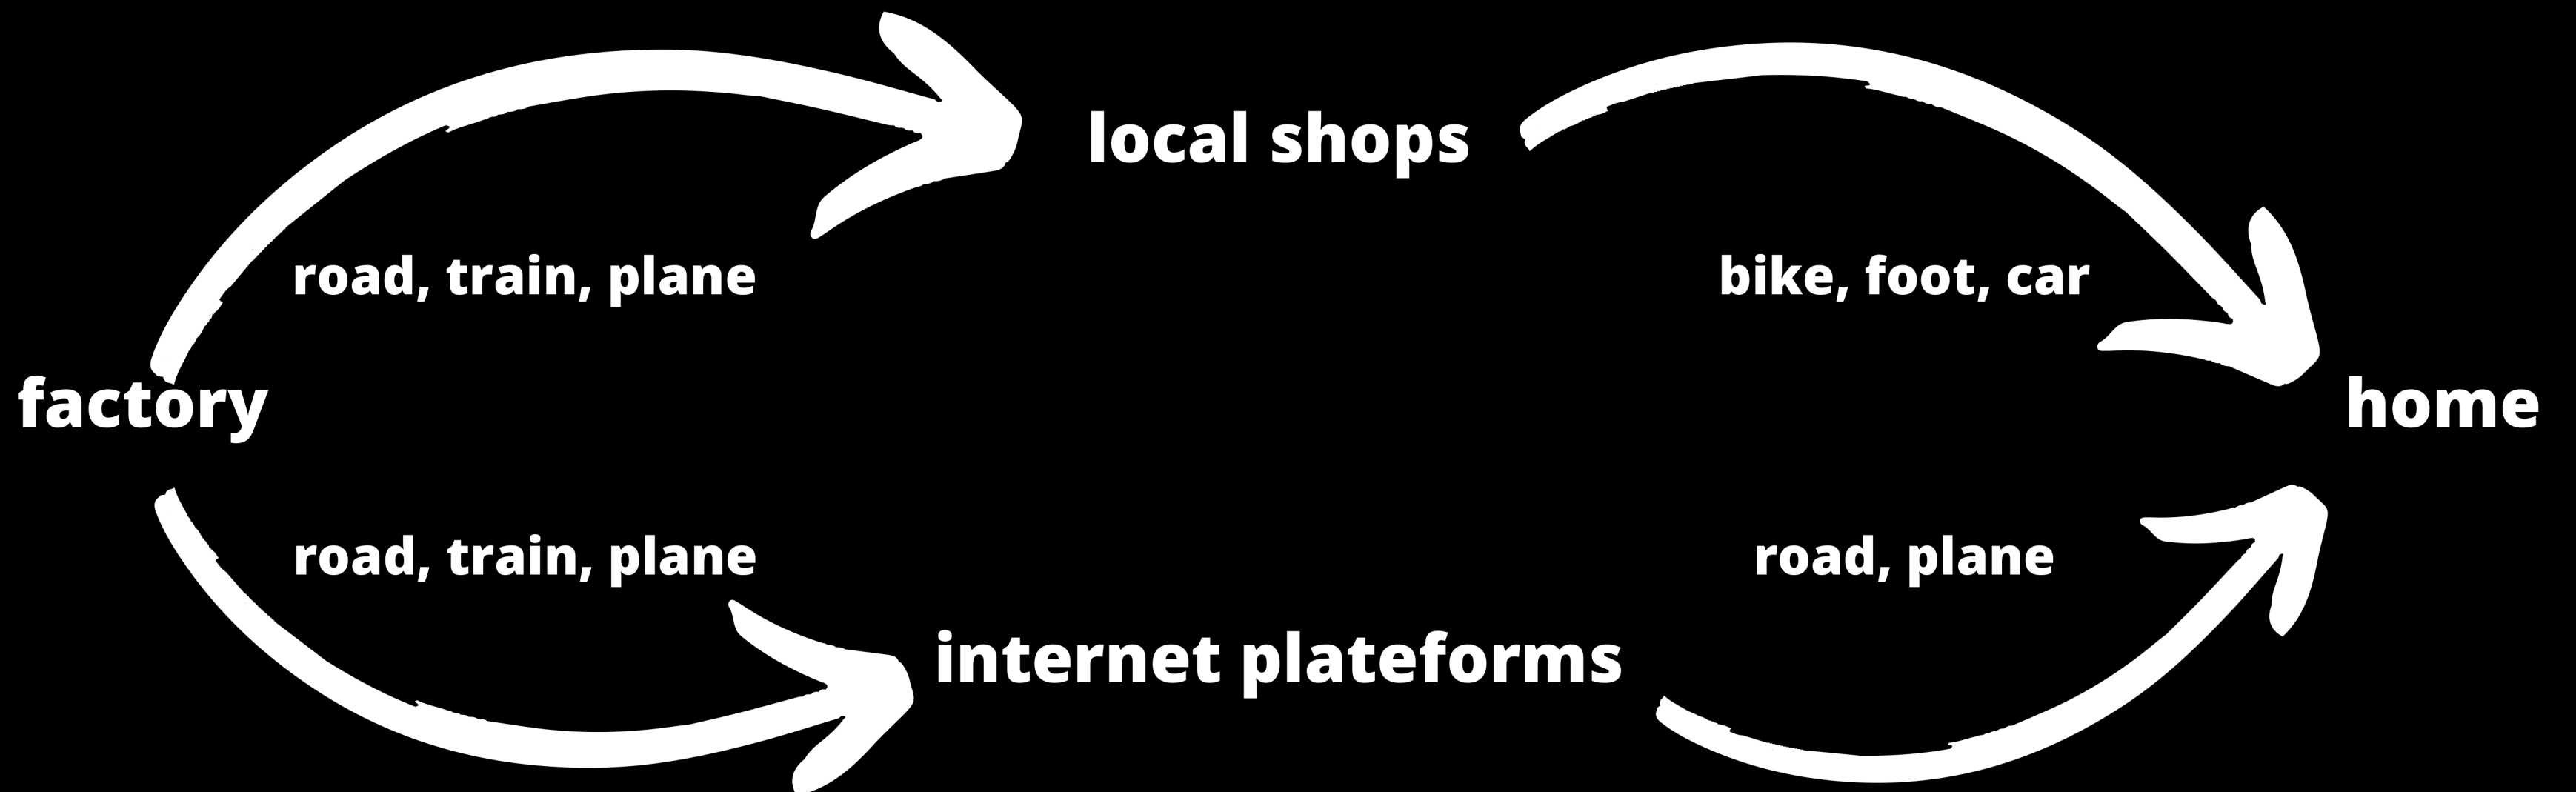

distribution chain

maker

sellers

end user

end of life

reusing

creating new products from old ones

**Handbag manufactured by
Borbonese using stored waste**

recycling

using it back in the chain of production

conclusion

shorten the transportation

if the factory is in the same town as the producer of raw materials, it uses less energy

provide repair service for EOL products

this would lessen the waste of throwing away old products
